Effective Presentation

Two main objectives for an effective Presentation:

- 1) increase people recall amount up to 10%-15%
- 2) do in a way that the final 10%-15% is exactly what you want

How?

- 1) following specific rules
- 2) adding images strictly related to what they have to recall

ab ovo

(from the beginning)

1) Very First = Company Name

2) Second = Name of Presentation

Western people read from top-left to bottom-right

3) Third = Slide Content
No more than 3 concepts per slide

4) Forth = Take away

What your audience has to take away from this slide

Take Away Here

5) Fifth = humanization
Show who you are

Repetita Iuvant

(if you want your audience remembers exactly the 10% you want, you have to repeat that 10% more times, from different angles, repeating concepts in the take Away area)

Few pills to remember

Don't assume the audience will all be experts.

Never underestimate your audience!

Check on the time that has been allotted to you.

Use a Sans Serif font:

This font is Arial.

This font is Comic Sans.

This font is Papyrus.

Serif fonts take longer to read...

This font is Times New Roman.

This font is Courier.

This font is Didot.

Some fonts look really good in **boldface**:

Arial vs. **Arial bold**

Comic Sans vs. **Comic Sans bold**

Papyrus vs. **Papryus bold**

Type size should be 18 points or larger:

AVOID USING ALL CAPITAL LETTERS
BECAUSE IT'S REALLY HARD TO READ!

Dark letters against a light background work.

Light letters against a dark background also work.

Many experts feel that a dark blue or black background works best for talks in a large room.

Dark letters against a light background are best for smaller rooms and for teaching.

Avoid red-green combinations because a significant fraction of the human population is red-green colorblind.

Other color combinations can be equally bad:

Other color combinations can be equally bad!

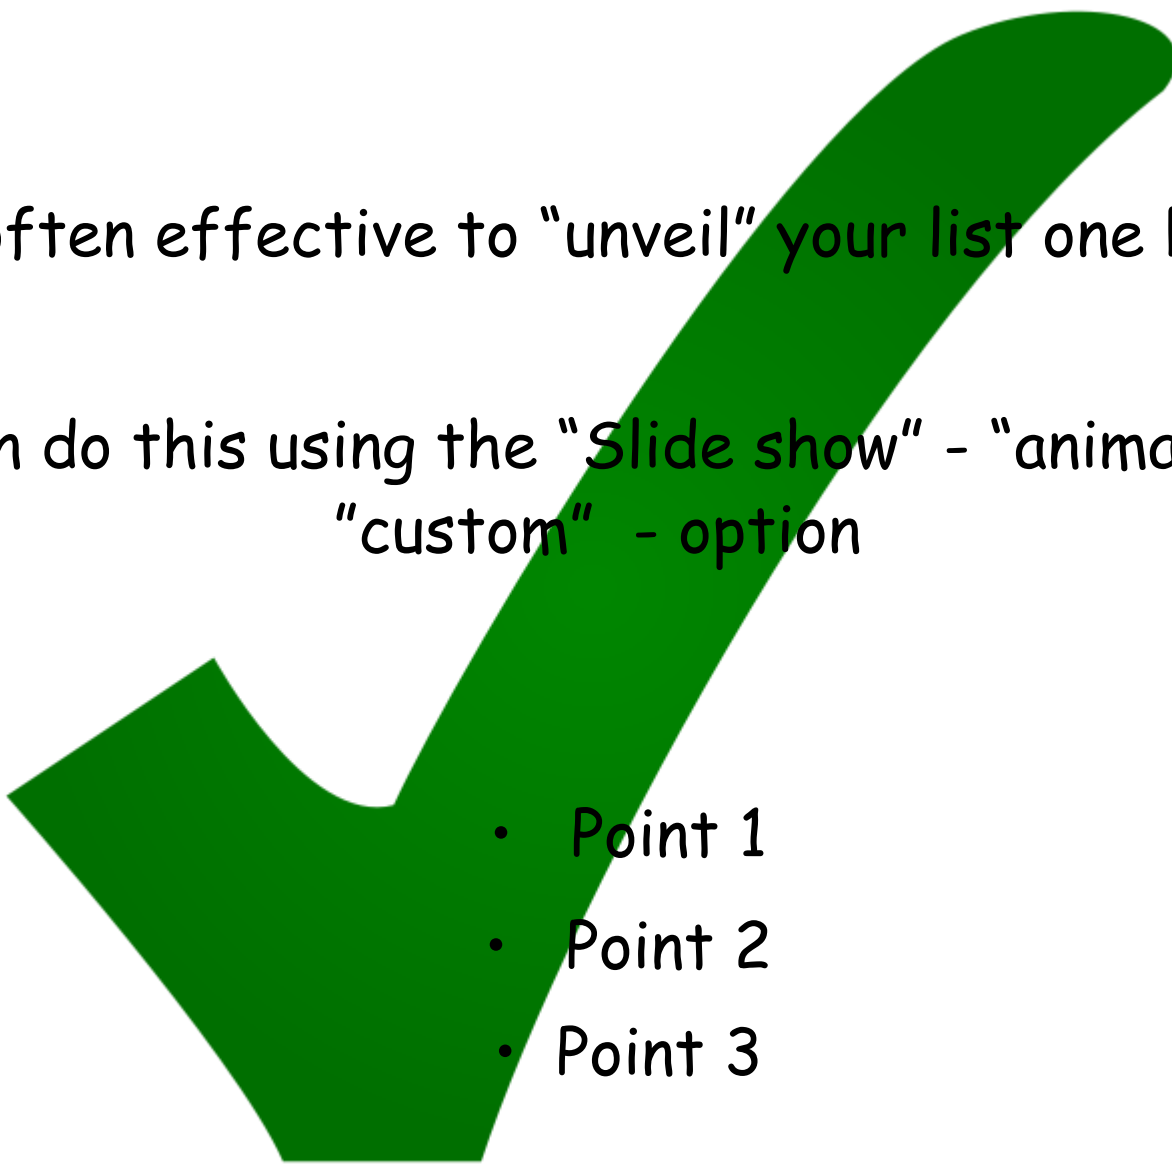

View your slides in grayscale to ensure that there is adequate color contrast in each slide.

Other color combinations can be equally bad!

It is often effective to "unveil" your list one by one:

You can do this using the "Slide show" - "animations" -
"custom" - option

- 
- Point 1
 - Point 2
 - Point 3

Avoid sublists!

- Item 1
 - Item 1a
 - Item 1b
 - Item 1c
- Item 2
 - Item 2a
 - Item 2b
- Item 3

Be generous with empty space.

Arrrrgh!

Don't try to show too many slides.

Often, less is more.
