System Flow

#### **GE Information Services**

- Receives carriers freight bills in EDI format
- Verifies shipping locations are valid
- Matches carrier freight bills to bills of lading
- Compares computed and billed charges
- Allocates freight costs to appropriate shipper cost centers
- Provides payment via Remittance Advice
- View data on carrier facsimile invoices
- Integrate existing applications and systems
- Use predefined or customized reports and graphs
- Access historical information instantly

## <u>"Big Three" Benefits</u>

- Reduce freight charges
- Reduce freight payment processing costs
- Make better buying decisions and negotiate better carrier contracts

## •How?

- By detecting carrier overcharges and invalid freight bills effectively
- Through EDI and automation of the auditing, cost allocation, and payment process
- Through historical data stored on a system that <u>you</u> control
