Procurement Business Process

Procurement Process Sourcing, Purchasing, Supplying

- Sourcing
 - Establishing Requirements, Soliciting Suppliers, Bidding and Selection
- Purchasing
 - Viewing, Choosing, Authorising, Ordering, Paying
- Supplying
 - Placing Bids, Accepting Orders, Dispatching Goods, Sending Invoices

The Main Procurement Process

There are three main types of purchase

• Direct Materials (MRP, Strategic))

These become part of the product
Examples: Components, raw materials, contract production labour

Plant and Equipment

- These are used for making the product or for running the company, but are still there at the end of the day.
- Examples: Milling machines, computers

Indirect Materials (MRO, Less Strategic)

- These are necessary to keep the company running but do not become part of the product although they are consumed.
- Examples: Office consumables, contract cleaning
